

Web-based Hydrologic Information Portal for the Upper San Pedro Basin (WHIP) - Focus Group 2
April 21, 2021
2:30 p.m. – 4:00 p.m.
Zoom

The WHIP Focus Group 2 is being held on **Wednesday, April 21 from 2:30 – 4:00 p.m.** by invitation to gather specific input that will help inform the final development phases of the Web-based Hydrologic Information Portal for the Upper San Pedro Basin (WHIP). The focus group is designed to gather input on the WHIP prototype, and how well it will meet the water information needs from scientists, researchers, land and water managers and leaders of local governments, agencies and businesses working in the Upper San Pedro Basin. This is a follow-on to Focus Group 1 which was held in November 2020.

Many invitees are also members of the Upper San Pedro Partnership (USPP). Per open meeting laws, the public will be able to attend in a listening-only mode. No action items will be generated, nor will any decisions be made by the USPP at the focus group. They are designed to gather information only that will be used to finalize the WHIP this spring and summer.

Members of the public will be provided an opportunity to submit input after the focus group via email to bbushman@tnc.org.
