

Program	Eligible Applicants	Federal/Non-Federal Cost Share	Current Status
<p>Water and Energy Efficiency Grants (Water Resources Planning Office)</p> <p>On-the-ground water management improvement projects, including projects that conserve water and address water supply reliability.</p>	<p>States, Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority located in the Western United States or United States Territories specifically: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming (the "Western United States"), and American Samoa, Guam, the Northern Mariana Islands, the Virgin Islands, and Puerto Rico ("Territories") (collectively "Western United States or Territories").</p> <p>Nonprofit conservation organizations that are acting in partnership and with the agreement of an entity described above.</p>	<p>Selected applicants may receive up to \$500,000 in Federal funds for projects to be completed within two years; or up to \$2 million in Federal funds for projects to be completed within three years.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>Fiscal year 2022 funding opportunity applications received by November 3, 2021 are currently under review.</p> <p>The fiscal year 2023 Funding Opportunity is anticipated for March 2022.</p>
<p>Small-Scale Water Efficiency Projects (Water Resources Planning Office)</p> <p>Small water efficiency improvements that have been identified through previous planning efforts.</p>		<p>Selected applicants may receive up to \$75,000 in Federal funds for projects to be completed within two years.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>Fiscal year 2021 selections were announced on August 31, 2021.</p> <p>The fiscal year 2022 funding opportunity is anticipated for February 2022.</p>
<p>Water Marketing Strategy Grants (Water Resources Planning Office)</p> <p>Planning activities to develop water marketing strategies that establish or expand water markets or water marketing activities between willing participants.</p>		<p>Selected applicants may receive up to \$200,000 in Federal funds for projects to be completed within two years; or up to \$400,000 in Federal funds for projects to be completed within three years.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>Fiscal year 2021 selections were announced July 1, 2021.</p> <p>The next funding opportunity is expected in fall or winter of fiscal year 2022</p>
<p>Drought Resiliency Projects (Water Resources Planning Office)</p> <p>Funding for on-the-ground projects and modeling tools that will increase water reliability and improve water management.</p>		<p>Selected applicants may receive up to \$500,000 in Federal funds for projects to be completed within two years; or up to \$2,000,000 in Federal funds for projects to be completed within three years.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>Fiscal year 2022 funding opportunity applications received by October 5, 2021 are currently under review.</p> <p>Fiscal year 2023 funding opportunity is anticipated in April 2022.</p>
<p>Environmental Water Resources Projects (Water Resources Planning Office)</p> <p>Environmental Water Resources Projects, including water conservation and efficiency projects that result in quantifiable and sustained water savings and benefit ecological values; water management or infrastructure improvements to mitigate drought-related impacts to ecological values; and watershed management or restoration projects benefitting ecological values that have a nexus to water resources or water resources management.</p>	<p>Category A: States, Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority.</p> <p>Category B: Nonprofit conservation organizations that are acting in partnership and with the agreement of an entity described above.</p> <p>Category C: Nonprofit conservation organizations submitting an application for a project to improve the condition of a natural feature without a category A partner must demonstrate that entities described in Category A in the applicable service area have been notified of the project and do not object.</p> <p>Applicants must be located in the Western United States or United States Territories specifically: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming (the "Western United States"), and American Samoa, Guam, the Northern Mariana Islands, the Virgin Islands, and Puerto Rico ("Territories") (collectively "Western United States or Territories").</p>	<p>Selected applicants may receive to \$2 million in Federal funds for a project to be completed within three years.</p>	<p>Fiscal year 2022 funding opportunity applications received by December 9, 2021 are currently under review.</p> <p>Fiscal year 2023 funding opportunity is anticipated in May 2022.</p>

Program	Eligible Applicants	Federal/Non-Federal Cost Share	Current Status
<p>Cooperative Watershed Management Program - Phase I (Water Resources Planning Office)</p> <p>Watershed group development, watershed restoration planning, and watershed management project design.</p>	<p>States, Indian tribes, local and special districts (e.g., irrigation and water districts), local governmental entities, and non-profit organizations that are located in the Western United States or Territories.</p>	<p>Selected applicants may receive up to \$100,000 in Federal funds. Funds may be awarded to an applicant per year, for a period of up to two years.</p> <p>Non-Federal Cost Share: No non-Federal cost-share required.</p>	<p>Fiscal year 2021 selections were announced June 15, 2021.</p> <p>The fiscal year 2022 funding opportunity is anticipated for late January 2022.</p>
<p>Drought Contingency Planning (Water Resources Planning Office)</p> <p>Funding for development, or update, of comprehensive drought plans.</p>	<p>States, Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority located in the Western United States (except Alaska).</p>	<p>Selected applicants may receive up to \$200,000 in Federal funds.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>Fiscal year 2021 selections were announced June 15, 2021.</p> <p>The fiscal year 2022 funding opportunity is anticipated for late January 2022 selections were announced on April 21, 2021.</p> <p>The fiscal year 2022 funding opportunity is anticipated for February 2022.</p>
<p>Title XVI Authorized Projects (Water Resources Planning Office)</p> <p>Funding for planning, design, and construction of specific congressionally authorized water recycling and reuse projects.</p>	<p>Sponsors of water reclamation and reuse projects specifically authorized for funding under Title XVI of P.L. 102-575.</p>	<p>Selected applicants may receive between \$1 million and \$6 million in Federal funds.</p> <p>Non-Federal Cost Share: 75% or greater.</p>	<p>The fiscal year 2022 funding opportunity is anticipated for January 2022.</p>
<p>Title XVI Water Infrastructure Improvements for the Nation Act (WIIN Act) Water Reclamation and Reuse Projects (Water Resources Planning Office)</p> <p>Funding for planning, design, and construction of Water Infrastructure Improvements for the Nation Act water recycling and reuse projects.</p>	<p>Sponsors of water reclamation and reuse projects with completed feasibility studies that have been submitted to Reclamation for review.</p>	<p>Selected applicants may receive between \$1 million - \$6 million in Federal funds.</p> <p>Non-Federal Cost Share: 75% or greater.</p>	<p>The fiscal year 2022 funding opportunity is anticipated for January 2022</p>
<p>Title XVI Feasibility Studies (Water Resources Planning Office)</p> <p>Funding for development of new Title XVI water reclamation and reuse project feasibility studies.</p>	<p>Entities with water delivery authority, all located in the Western United States or Territories (except Alaska).</p>	<p>Selected applicants may receive up to \$150,000 in Federal funds for studies to be completed in 18 months; or up to \$450,000 in Federal funds for studies to be completed within three years.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>No funding opportunity is planned this year.</p>
<p>Desalination Construction (Water Resources Planning Office)</p> <p>Funding for planning, design, and construction of Water Infrastructure Improvements for the Nation Act brackish groundwater and ocean desalination projects.</p>	<p>Sponsors of desalination projects located in the Western United States or Territories (except Alaska and Hawaii) with completed feasibility studies that have been submitted to Reclamation for review.</p>	<p>Selected applicants may receive between \$1 million - \$6 million in Federal funds.</p> <p>Non-Federal Cost Share: 75% or greater.</p>	<p>The fiscal year 2022 funding opportunity is anticipated for January 2022.</p>

Program	Eligible Applicants	Federal/Non-Federal Cost Share	Current Status
<p>Applied Science Grants (Water Resources Planning Office)</p> <p>Projects to develop hydrologic information and water management tools and to improve modeling and forecasting capabilities.</p>	<p>States, Indian tribes, irrigation districts, water districts, universities, non-profit research institutions, organizations with water or power delivery authority, or non-profit organizations located in the Western United States or Territories.</p>	<p>Selected applicants may receive up to \$200,000 in Federal funds for projects that can be completed within two years.</p> <p>Non-Federal Cost Share: 50% or greater.</p>	<p>Fiscal year 2021 selections were announced September 2, 2021.</p> <p>The fiscal year 2022 funding opportunity is anticipated for February 2022.</p>
<p>Colorado River Basinwide & Basin States Salinity Control Programs (Upper Colorado Basin Regional Office)</p> <p>The Colorado River Basin Salinity Control Program was designed to meet the objectives of the Colorado River Basin water quality standards.</p>	<p>Legal entities that own or operate features to be replaced and/or constructed and capable of contracting with Reclamation.</p> <p>Proposed projects that are located in the Colorado River Basin above Hoover Dam. Projects must use proven technology.</p> <p>Proposed projects cannot be of a nature that creates undue financial risk for Reclamation.</p> <p>Proposed projects must be in an area where salt load can be provided.</p> <p>Proposed projects must provide sufficient pressure and appropriate velocity where topography enables it to allow for the future installations of high efficiency on-farm improvements (i.e. sprinkler systems).</p>	<p>Selected applicants may receive between \$30 million - \$40 million in Federal funding in the Colorado River Basinwide Program.</p> <p>Selected applicants may receive between \$5 million - \$10 million in Federal funding in the Basin States Program.</p> <p>If an entity chooses to help fund their project(s) with additional non-Federal funding, this will create a cost share project with two or more funding sources. The non-Federal funding and the Federal funding shall be spent concurrently at the agreed-upon cost share percentage. This cost share percentage will remain in effect for the life of the agreement.</p>	<p>The funding opportunity is in draft and will be posted June 2022.</p>
<p>Columbia-Pacific Northwest Region Water Conservation Field Services Program</p> <p>The Water Conservation Field Services Program funds water conservation planning activities with Reclamation partners. The four eligible project types are development or update to water conservation plans, system optimization reviews, design of water management improvements, and demonstration projects. These activities help Reclamation partners strategically address water management.</p>	<p>Irrigation and water districts, Tribes, and state governmental entities with water delivery authority and a defined relationship to one or more authorized Bureau of Reclamation project(s) located within the Columbia-Pacific Northwest Region.</p>	<p>Selected applicants may receive up to \$25,000 in Federal funds for projects to be completed within two years.</p> <p>Federal Cost Share: 50% or less.</p> <p>Non-Federal Cost Share: 50% or more.</p>	<p>The fiscal year 2022 funding opportunity posting is planned for January 2022.</p> <p>The fiscal year 2022 funding opportunity will have two closed dates: March 2022 and April 2022.</p> <p>Selections will be made April 2022 and June 2022.</p>
<p>Lower Colorado Basin Region Water Conservation Field Services Program</p> <p>The Water Conservation Field Services Program funds water conservation planning activities with Reclamation partners. The four eligible project types are development or update to water conservation plans, system optimization reviews, design of water management improvements, and demonstration projects. These activities help Reclamation partners strategically address water management.</p>	<p>Eligible applicants are states, Indian tribes (including Native Hawaiian), irrigation districts, water districts, or other organizations with water or power delivery authority located in the Lower Colorado Region or Hawaii.</p>	<p>Selected applicants may receive up to \$100,000 in Federal funds for projects to be completed within 2 years.</p> <p>Federal Cost Share: 50% or less.</p> <p>Non-Federal Cost Share: 50% or more.</p>	<p>The deadline for fiscal year 2022 funding was October 8, 2021.</p> <p>The proposals have been evaluated and nominees selected. Awardees will be notified in January or February 2022 contingent upon funding.</p>
<p>Upper Colorado Basin Region Water Conservation Field Services Program</p> <p>The Water Conservation Field Services Program funds water conservation planning activities with Reclamation partners. The four eligible project types are development or update to water conservation plans, system optimization reviews, design of water management improvements, and demonstration projects. These activities help Reclamation partners strategically address water management.</p>	<p>Eligible applicants include any state, Indian tribe, irrigation district, water district, or other organization with water or power delivery authority located in the geographic areas covered by the Albuquerque Area Office, Provo Area Office, and Western Colorado Area Office.</p>	<p>Selected applicants may receive up to \$100,000 in Federal funds for projects to be completed within two years.</p> <p>Federal Cost Share: 50% or less.</p> <p>Non-Federal Cost Share: 50% or more.</p>	<p>The funding opportunity will be posted February 2022 with an open deadline. Funding will start March 2022. The program will continue to fund projects until funds run out.</p>

Program	Eligible Applicants	Federal/Non-Federal Cost Share	Current Status
<p>Missouri Basin and Arkansas-Rio Grande-Texas Gulf Regions Water Conservation Field Services Program</p> <p>The Water Conservation Field Services Program funds water conservation planning activities with Reclamation partners. The four eligible project types are development or update to water conservation plans, system optimization reviews, design of water management improvements, and demonstration projects. These activities help Reclamation partners strategically address water management.</p>	<p>Irrigation and water districts, Indian Tribes, states, regional and local authorities whose members include organizations with water and hydropower delivery and authority, and other organizations with water and hydropower authority. In addition, non-profit conservation organizations that are acting in partnership with the afore-mentioned entities are also eligible. All applicants must be in the Nebraska-Kansas Area Office boundary area.</p>	<p>Selected applicants may receive up to \$100,000 in Federal funds for projects to be completed within two years.</p> <p>Federal Cost Share: 50% or less.</p> <p>Non-Federal Cost Share: 50% or more.</p>	<p>The fiscal year 2022 funding opportunity is currently being developed. The anticipated posting date and application due date is 4th quarter of 2022.</p>
<p>Central Valley Project Habitat & Facility Improvements (California-Great Basin Regional Office)</p> <p>Provides funding to enhance chinook salmon and steelhead trout production and associated habitats in the Central Valley, consistent with Public Law (P.L.) 102-575, Title XXXIV, Central Valley Project Improvement Act, Section 3406(b), and 3407(e) and the 2020 Record of Decision implementing the 2019 proposed action and Incidental take statements for the long term operation of the central valley project and state water project.</p>	<p>County governments, special district governments, nonprofits having a 501(c)(3) status with the Internal Revenue Service, other than institutions of higher education, city or township governments, Native American tribal governments (Federally recognized), and state governments.</p>	<p>Selected applicants may receive up to \$40 million per year for three years.</p> <p>Federal cost share is 50% only on fish screens pursuant to Public Law 102-575 section 3406(b)(19).</p> <p>For all other projects, there is no cost share requirement.</p>	<p>The fiscal year 2022 funding opportunity was posted September 2, 2021. Applications are due November 30, 2021</p>
<p>Central Valley Project Improvement Act Habitat Restoration Program (California-Great Basin Regional Office)</p> <p>Implements actions intended to protect, restore, and enhance special-status species (excluding fish) and their habitats affected by operation of the central valley project, with a special emphasis on federally listed species.</p>	<p>Any non-federal entity can apply.</p>	<p>Selected applicants may receive up to \$1 million in Federal funds for a period up to five years.</p> <p>Non-Federal cost share is not required but is considered in evaluation of the applications.</p> <p>Applicants receive additional scoring points if a cost share is provided.</p>	<p>The funding opportunity will be posted by September 30, 2022. The funding opportunity will be for fiscal year 2023 and 2024 awards.</p>
<p>Bay-Delta Restoration Program: CALFED Water Use Efficiency Grants (California-Great Basin Regional Office)</p> <p>Through this program, Reclamation provides funding for projects that increase water reliability and improve water management and result in benefits for the California-Bay Delta, including the use of expanded technologies and improved capabilities consistent with the goals of the October 19, 2018, Presidential Memorandum on Promoting the Reliable Supply and Delivery of Water in the West.</p>	<p>Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority located in the CALFED solution area within the State of California.</p>	<p>Selected applicants may receive up to \$500,000 in Federal funds for projects to be completed within two years.</p> <p>Non-Federal Cost Share: At least 50% of costs.</p> <p>Federal Cost Share: Max 50% of costs.</p>	<p>The fiscal year 2021/2022 funding opportunity was posted on November 18, 2020. Fiscal year 2021 applications were due January 18, 2021. Proposals received after January 18, 2021 and before November 30, 2021 will be considered for fiscal year 2022 funding.</p>

Program	Eligible Applicants	Federal/Non-Federal Cost Share	Current Status
<p>Agricultural Water Use Efficiency Program (California-Great Basin Regional Office)</p> <p>Provides funding to foster water efficiency savings in the agricultural sector specifically. Reclamation collaborates with the Natural Resources Conservation Service and their Environmental Quality Incentives Program to improve on farm water use efficiency.</p>	<p>States, Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority located in the Western United States or United States Territories as identified in the Reclamation Act of June 17, 1902, as amended.</p>	<p>Selected applicants may receive up to \$500,000 in Federal funds for projects to be completed within two years.</p> <p>Non-Federal Cost Share: At least 50% of costs.</p> <p>Federal Cost Share: Max 50% of costs.</p>	<p>The fiscal year 2021 funding opportunity was posted on September 7, 2021. Applications were due by November 1, 2021.</p>
<p>Columbia Snake Salmon River Recovery Office (Columbia-Pacific Northwest Regional Office)</p> <p>Provides funding to eligible entities in the Grande Ronde and Wallowa Basins to identify and prioritize habitat improvement opportunities, manage and share data, combine research and monitoring efforts with implementation of projects, and support tributary assessments and other planning efforts.</p>	<p>Local governments, special districts, and non-profit organizations.</p>	<p>Selected applicants may receive up to \$1.5 million in Federal funds for projects completed within five years.</p> <p>No cost share required from the recipient.</p>	<p>A funding opportunity is planned for the 2nd quarter of fiscal year 2022.</p>
<p>Research and Development for the Desalination and Water Purification Research - Research Projects (Research and Development Office)</p> <p>The Desalination and Water Purification Research Program works with Reclamation researchers and partners to develop innovative, cost-effective, and technologically efficient ways to desalinate or treat water. This program seeks research opportunities where the benefits are widespread and where private-sector entities are not able to make the full investment and assume all the risks. The goal is to increase water supplies by reducing the cost, energy consumption, and environmental impacts of treating impaired and otherwise unusable waters.</p>	<p>Individuals, institutions of higher education, profit organizations, state and local governmental entities, non-profit organizations, federally funded research and development centers, and Indian tribal governments and organizations.</p> <p>Foreign entities are not eligible for funding under the authorizing legislation for this program.</p> <p>Federal agencies are not eligible to apply.</p>	<p>Funding Group I: Laboratory Scale projects - Selected applicants may receive up to \$250,000 in federal funding for projects that can be completed within two years.</p> <p>Funding Group II: Pilot Scale projects - Selected applicants may receive up to \$800,000 in Federal funding for projects that can be completed within two years.</p> <p>For institutions of higher education, non-Federal cost share is not required but highly encouraged. All other applicants must provide at least 50% non-Federal cost share.</p>	<p>The fiscal year 2022 funding opportunity closed September 9, 2021.</p>

Program	Eligible Applicants	Federal/Non-Federal Cost Share	Current Status
<p>Desalination and Water Purification Research Program - Pitch to Pilot (Research and Development Office)</p> <p>The Desalination and Water Purification Research Program works with Reclamation researchers and partners to develop innovative, cost-effective, and technologically efficient ways to desalinate or treat water. This program seeks research opportunities where the benefits are widespread and where private-sector entities are not able to make the full investment and assume all the risks. The goal is to increase water supplies by reducing the cost, energy consumption, and environmental impacts of treating impaired and otherwise unusable waters. The focus of Pitch to Pilot is to attract small companies, entrepreneurs that have solutions but are in need of seed money to test their technologies and processes and increase awareness of their solution in order to accelerate commercialization.</p>	<p>Individuals/entrepreneurs, institutions of higher education, profit organizations, state and local governmental entities, non-profit organizations, federally funded research and development centers, and Indian tribal governments and organizations.</p> <p>Foreign entities are not eligible for funding under the authorizing legislation for this program.</p> <p>Federal agencies are not eligible to apply.</p>	<p>Selected applicants may receive up to \$200,000 in Federal funding for projects that can be completed within 18 months.</p> <p>No cost share is required but highly encouraged.</p>	<p>The fiscal year 2021 funding opportunity closed June 3, 2021.</p>
<p>Native American Affairs Technical Assistance Program (Native American and International Affairs Office)</p> <p>Establishes cooperative working relationships, through partnerships with Indian tribes and tribal organizations, to assist tribes as they develop, manage, and protect their water and related resources.</p>	<p>Federally recognized Indian tribes or tribal organizations in the 17 western states identified in the Reclamation Act of June 17, 1902 including Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming.</p>	<p>Selected applicants may receive up to \$200,000 in Federal funding for projects that can be completed within two fiscal years.</p> <p>No cost share is required.</p>	<p>The fiscal year 2022 funding opportunity closed October 20, 2021.</p>
